

Eligibility Requirements for Certification

Individual candidates for certification (CME or CMP) will:

- Be actively employed in the masonry industry;
- Have 5 or more years of experience in the masonry industry OR a combination of experience and equivalent education (*Example: 4-year college degree in construction-related major + 1 yr. masonry construction experience; or 2-year associate degree in construction-related major + 3 years' masonry construction experience*);
- Complete the program educational requirements, as defined by the Certification Board of Governors, within a three-year period.
- Pledge to adhere to the highest standards of service, workmanship and business practices as set forth in the Code of Ethics established by the Arizona Masonry Council.

Companies that seek designation as a Certified Masonry Contractor (CMC) will:

- Be actively engaged in masonry construction as a masonry contractor and have 5 or more years of experience in masonry construction;
- Demonstrate that the majority of each of the following roles in masonry construction operations have successfully attained (and maintained) CME or CMP certification: company owners, company president, management (*excluding office management/staff not active in construction operations,*) estimators, and field supervisors
 - Masonry contractors with fewer than 10 employees and annual volume of less than \$1,000,000 are exempt from the majority requirement; however, all owners active in construction operations shall be required to attain and maintain CME status;
- Pledge to adhere to the highest standards of service, workmanship and business practices as set forth in the Code of Ethics established by the Arizona Masonry Council.

All Arizona Masonry Council Certification Classes are open to any masonry contractor and/or masonry professional, not just members of the Arizona Masonry Council. However, the Arizona Masonry Council's Certification Designations are restricted to members only of Arizona Masonry Council.
